Introducing heat proofing and water proofing. Keeps the interior cool, crisp and moisture free

Company Profile

CoolTech, established in 2000, was created to improve the indoor experience by creating a comfortable surrounding.

Our ancestors were the main importer of chemicals. When Pakistan got independence, our founder's grandfather Mr. Abdul Khaliq Gandhak Wala (Late) was one of the first ones who opened a chemical outlet in Jodia Bazar, Karachi. Every chemical-related industrialist and Businessman knows him well all over Pakistan.

With over two decades of experience, CoolTech offered Roof Heat Proofing for the first time in Pakistan, proving to be outstanding as it successfully tackled the hot weather, especially in Karachi where it was established.

As leaking roofs grew a major concern, through various RND projects, CoolTech introduced waterproofing which proved to be a revolution in indoor comfort.

The mission of CoolTech is simple, which is to create products that are economical and provide results while also putting the customer at the heart of everything.

COOLTECH PLUS '100

5 YEAR GUARANTEE

SINCE
2000

CoolTech Plus '100 is a water-based, high solids, ceramic heat reflection coating. This highly effective radiant barrier, heat reflecting roof coating paint is designed for maximum thermal efficiency, upto 90% reflectivity, ultra violet resistance and years of trouble free service. The warranty period for this product is 5 years. **We recommend CT Plus 100 as it is the most highly effective product with a warranty period of 5 years.**

COOLTECH ADVANCE '30

3 YEAR GUARANTEE

CoolTech Advance '30 is a water-based, high solids, ceramic heat reflection coating. This highly effective radiant barrier, heat reflecting roof coating paint is designed for maximum thermal efficiency, upto 70% reflectivity, ultra violet resistance and years of trouble free service. The warranty period for this product is 3 years. It is a high effective product for roof heat reflection and insulation.

COOLTECH TOTAL '20

2 YEAR GUARANTEE

CoolTech Total '20 is a water-based, high solids, ceramic heat reflection coating. This highly effective radiant barrier, heat reflecting roof coating paint is designed for maximum thermal efficiency, upto 50% reflectivity, ultra violet resistance and years of trouble free service. It is a medium effective product with a warranty period for this product is 2 years.

Aqua Cool '021

Aqua Cool '021 is a combination of CT Plus'100 and Aqua Guard '220 which protects your roof from seepage, leakage, and heat. It is designed specially for those surfaces which are already affected by cracks which has weakened the roof surface. By applying Aqua Cool '021, your roof will not only reflect sun rays, but will also protect you from water leakage and seepage.

Aqua Guard '220

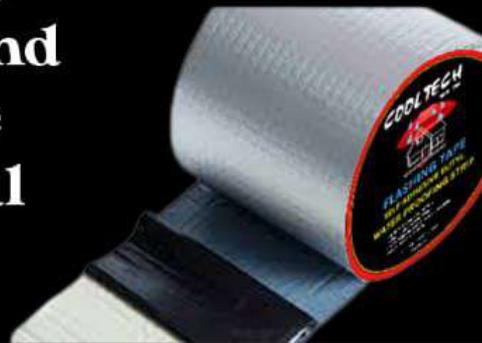

Aqua Guard '220 is a one component, acrylic co-polymer based flexible waterproofing system ideal for use on cementitious and metal surface. Aqua Guard '220 is suitable for roof waterproofing system in damp conditions, where other systems cannot be used. It is a double application based waterproofing system and is best for seepage.

CoolTech Butyl Waterproof Sealing Tape

A lead replacement, self-adhesive flashing strip, ideal for emergency repairs. Instant waterproof seal once applied. Grey finish. Quick and easy to use. For use on wood, glass, metal, brick and cement. Curing time immediate at normal temperature.

Aqua Bond

CoolTech Aqua Bond is a great way to restore cracked ceilings to a smooth 'good as new' finish. Its flexible paint formulation not only covers cracks but prevents them from reappearing. Simply clean the surface that requires crack filling and apply CoolTech Aqua Bond with the help of a scraper
